
ENERGY STAR v3 for the HVAC Contractor

Purpose:

With the ENERGY STAR for Homes Version 3 guidelines, EPA is requiring that HVAC systems in all homes that earn the ENERGY STAR label be installed according to industry-accepted Quality Installation (QI) guidelines as established in the ENERGY STAR HVAC QI checklist. Homes that earn the ENERGY STAR label must meet all of the requirements of this checklist and the form must be signed by a qualified, credentialed HVAC contractor.

HVAC Quality Installation Oversight Organizations (H-QUITOs) are the EPA-recognized independent, third-party oversight organizations that establish the required credentialing programs and provide training, oversight, and QA activities for HVAC contractors who install systems in Version 3 ENERGY STAR qualified homes. Advanced Energy is the second organization to become an H-QUITO and supports NC and surrounding states.

3 Steps to Success

Step 1:

Contact [Advanced Energy's Quality-Assured Professional \(QAP\) Program](#)
919-857-9000
QAP@AdvancedEnergy.org

Step 2:

Advanced Energy will guide you through the following requirements:

- Attend an Information Session
- Submit an application
- Obtain approval to attend Orientation and Technical Training
- Pass Credentialing Exam

Note: Application, Training, & Associated Costs are required for this program and varies depending on size of business

Step 3:

Begin working on ENERGY STAR jobs!

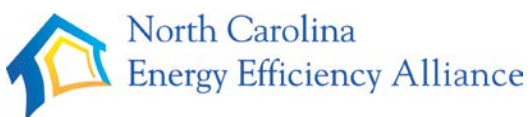

Advanced Energy will continue to provide technical assistance, free job aids and learning materials, and oversight to help you become a leading energy efficient contractor.
